It is a requirement that we communicate results to your NHS GP in order that they can make recommendations about your future care. By submitting this form you acknowledge and accept that:

- A copy of your report will be sent to your GP
- Neither the radiographer who has conducted the scan or the radiologist reporting it is able to discuss the findings of the scan with you
- It is important that you discuss your results with a medical professional and do not use AI to analyse the report as that is not a reliable source of information
