History

Have you had MRI before? If so, when and where?
What were you doing when the pain began?
Do you have any other medical conditions e.g. OA, RA?
Are you taking any medications?
Please briefly describe your symptoms:

Area(s) of Interest

Please mark an X on this body map to show where you are experiencing pain specifically, and also describe the location in words:

MRI SELF REFERRAL FORM

Your MRI Journey

1. Choose your MRI package

Choose the option that suits you and book your appointment directly with Hampshire Clinic. A straightforward option if you are looking for an MRI scan of a joint.

MRI of one joint – £495

A focused option if you're experiencing symptoms in one particular joint.

MRI of two joints – £900

Ideal if you're experiencing symptoms in two joints and would like both areas assessed as part of the same pathway.

MRI of three joints – £1,100

For patients experiencing symptoms in three joints who would benefit from a broader assessment.

2. Have your MRI

Your scan will be carried out by our experienced imaging team. The report usually available within 48- 72 hours.

3. Meet with a physiotherapist

As part of your package, you'll have a full physiotherapy assessment.

Your physiotherapist will discuss your symptoms, talk through your MRI results and answer any questions you may have. They can then recommend the most appropriate next steps based on your assessment.

4. Decide what happens next

You won't be left wondering what to do after your MRI. Depending on your symptoms and assessment, your physiotherapist may recommend continuing with treatment at Hampshire Clinic. This could include:

Recover - Physiotherapy

Continue with a tailored programme of physiotherapy to help improve movement, strength and function.

- Follow-up physiotherapy appointments
- A programme tailored to your needs
- Advice and exercises to support your recovery
- Ongoing support from your physiotherapy team

Relieve - Joint injections

For suitable patients, joint injections may be an option to help manage pain and inflammation.

Expert - Orthopaedic consultation

A consultant can review your MRI, discuss your symptoms and explain the treatment options available to you. Where appropriate, this may include non-surgical treatment or consideration of surgery.

Consent

By submitting this form you are consenting for the Imaging department to contact you in relation to this examination, booking, subsequent payment etc.
